echos-echo.link

Software Engineer who is seeking opportunities to learn more by solving problems.

Technical Skills + Soft Skills

- Proficient: JavaScript / TypeScript, Next.js, Node.js, React / Redux, Git, Express, HTML / CSS, Axios
- Knowledgeable: Python, C, Java, SQL
- Strong communication: able to clarify what needs to be done, communicate with my teammates to see where they stand
- Time management: putting tasks into priority order, delegating them to teammates according to their skills and availability.
- Comfortable with working with digital media
- Highly adaptable; capable of picking up new skills and learning quickly

Technical Projects

Ao3 Tag Muting CSS Generator | Solo Project, 2023 | Try it out | GitHub
- Built using Next.js; allows users to generate CSS to keep unwanted content from appearing on their Ao3
- Landing page includes detailed notes, instructions, and photos for users to follow along

Optimate | Software Engineer, Lead UI/UX, October 2022 | Try it out | GitHub
- Dating app in which users are matched with recommended users via an algorithm based on set preferences
- Drew up wireframes, created an animated background, enabled a user to edit and view their profile settings, and allowed a user to delete their account

I See Hue | Solo Project, September 2022 | Try it out | GitHub
- A single row, color sorting game. Built using React and react-beautiful-dnd to enable drag & drop functionality

Experience/Volunteer Work

Island Photography, Production Staff and Photographer (Temporary) — May 2022 - July 2022
- Worked in-office to make sure photos were high quality and being matched with the correct client before being sent out; marked and quality checked over 2000 photos
- Occasionally worked at events to take photos and adapted to deliver consistent quality even when equipment spontaneously failed

Admin, Lead Translator, Team S3 — November 2017 - January 2021
- Procured, scanned, translated, typeset, and published foreign works in Korean and Japanese to English
- In charge of recruiting/training new teammates
- Occasionally collaborated with other translation teams on work, organized the translations/typesets necessary to send back.

Midnight Oil Barista, RIT (temporary) — September 2019 - May 2020
- Prepared food items while attending to customers in an efficient but amenable manner for the cafe

Education

Fullstack Academy Web Development Bootcamp — August 2022 - October 2022
- 13 week course where I learned React, Redux, PostgreSQL, Express, as well as other essential libraries for full stack engineers to have in their arsenal. Pair programmed daily along with several projects in the curriculum.

Rochester Institute of Technology — August 2018 - May 2022
Computer Science, Japanese Modern Language and Culture

Cooper Union STEM Program — July 2016 - August 2016
- Worked in teams of 3-5 people to prototype a marketable product within 6 weeks; our team proposed a thermos heatable via bluetooth and Arduino, which began appearing in the market a few months afterward.
